

AQUAMIND AI RETAIL INTELLIGENCE

Turn Every Robot into a Top-Performing Sales

From talking and moving to understanding your brand, customers, and sales.

AquaMind is an AI interaction OS for retail robots. It orchestrates AI conversations, brand knowledge, product guidance, on-screen content, and robot behaviors — turning robots into active participants in customer service and sales.

Turn Robot Capabilities into Manageable Customer Experiences

Retail robots can move, display content, and answer questions. But real-world environments bring challenges — noise, fragmented knowledge, and limited visibility into interaction performance. AquaMind provides a unified orchestration layer connecting AI, robot hardware, and retail operations.

Core Capabilities

Brand Knowledge & Intelligent Product Guidance

Build a brand-specific knowledge base to understand customer needs and deliver accurate, expert recommendations.

Customer Engagement & Marketing

Drive engagement and conversion through multimodal interactions, campaign delivery, and performance tracking.

CRM & Membership Integration

Connect membership systems to identify customers and enable personalized service and targeted marketing.

Multimodal Behavior Orchestration

Coordinate voice, displays, motion, expressions, and lighting for natural, seamless interactions.

Navigation & Spatial Interaction

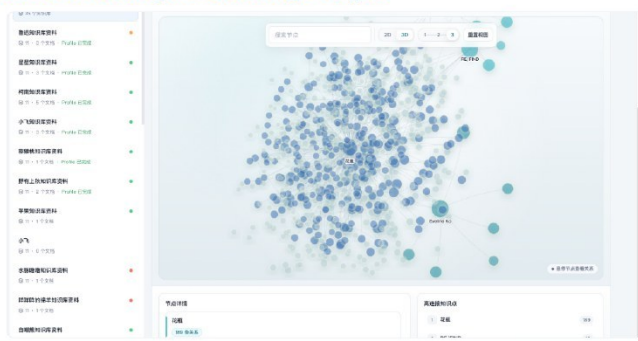

Enable autonomous navigation, route planning, spatial awareness, and interactive guided tours.

Store Operations Support

Monitor device status, track performance data, and generate operational insights for smarter store management.

Brand Knowledge & Knowledge Graphs

Hardware Configuration & Simulation

Platform Capabilities

AI & Voice

AquaMind Core unifies brand knowledge and AI services with multilingual support, voice cloning, and ~500 ms on-device response.

Robotics & Ecosystem

Unified control of the mobile base, head, arms, displays, and lighting, with support for SLAM, autonomous navigation, LeRobot, and enterprise integrations.

Book a Demo

Empower your robot to understand your brand, serve customers, and drive conversion.
